

## **ACCEPTANCE AND DISPOSAL OF DOMESTIC LOADS OF ASBESTOS**

These guidelines apply to the disposal of domestic asbestos at the Eaglehawk landfill. Attached is an application form which **MUST** be completed and submitted to the Eaglehawk Landfill. Asbestos will only be accepted between the hours of 8:00am and 4:00pm daily and there could be delays around staff break times. Loads are limited to a maximum of 10m<sup>2</sup>, with dimensions of parcels not exceeding 1200 x 900mm. Loads exceeding these limits must be transported by a licenced asbestos removalist.

1. The procedures dictated by Asbestos Victoria for the safe removal and transportation of Asbestos **MUST** be adhered to including sizing of parcels, refer to link below: **Any parcels that are deemed not to comply will be refused.**  
<http://www.asbestos.vic.gov.au/in-the-home>
2. Asbestos is to be wrapped in accordance with regulations, in two layers of thick plastic sheeting or approved asbestos bags, securely taped and marked Asbestos.
3. Material is to be unloaded and stacked in bin by hand and should easily be able to be handled by one person. Unloading should only commence at the direction of the supervising landfill staff member with each parcel being inspected to ensure the integrity of the parcels. Parcels should be handled such to minimise the risk of breakage and subsequent asbestos exposure.
4. The application form must be submitted to the weighbridge operator who will verify the information on the form before directing to the unloading area for disposal. Whereby an application form has not been completed, the weighbridge operator will supply you with a form and direct you to an isolated area where the form can be completed. Upon completion of the form it must be submitted to the inspecting Landfill staff member before unloading.
5. Direction will be provided from the weighbridge operator on where you will be required to go to unload. You must adhere to the direction given and do not commence unloading until being given direction to do so by the supervising landfill staff member.
6. **It is the responsibility of the transporter/customer to unload all parcels, bags and place in bin.**

**Applicant Details**

Contact person.....

Property Address .....

.....Postcode.....

Postal Address for Source of Material.....

.....Postcode.....

PH.....Mobile.....

**Disposal Details**

Volume of material (M<sup>2</sup>).....

In what form is the material:

- a. Sheeting Material – Wall
- b. Sheeting Material – Roof
- c. Piping
- d. Insulation
- e. Other

(please specify).....

I have read and understand the requirements of safely removing and transporting up to 10 square metres, as dictated by Asbestos Victoria and acknowledge that quantities greater than this must be removed and transported by a licenced asbestos removalist. Yes/No

All parcels and bags are securely wrapped, taped and plastic surface is clean. Yes/No

Transporter/ Customer is responsible for all unloading & placing in bin. Yes/No

Can the material be unloaded by hand & hand stacked in bin safely? Yes/No

Vehicle Rego.....

***If you have answered no to any question your material will not be accepted.***

**Certification**

I / WE (Applicant's Name).....

**Being the Person generator of the asbestos containing material, confirm that all details supplied are true and correct.**

**Full Name.....Signature.....**

**Date...../...../.....**

**Office Use Only – Acceptance/Rejection of loads**

Was load accepted for disposal? Yes/No

If No, select reason from the following:

- a. Packaging does not meet legislative requirements.
- b. Load was unable to be unloaded safely.
- c. False or incorrect information was declared on application form

**Inspected by COGB staff: Name.....**
